Planning Commission Members -

Regarding the agenda item for June 26, 2024 meeting to approve the meeting minutes for the previous meeting, I would ask that the minutes for Item #4 "American Towers Corp" be expanded to include the other relevant requests that were discussed at the meeting two weeks ago. The meeting minutes as currently written only address the need for involvement of State of California Fish & Wildlife and exploration of alternative safe routes.

I would like to see the meeting minutes also include mention of incorporation of the Midcoast Community Council's (MCC's) letter and the public comments in future consideration of the project. There were many deficiencies in the application highlighted at the meeting such as lack of proper oversight protocols of the work being performed, lack of inclusion of highlighted biological impact, and lack of impact on other users of the road, including hikers, bikers, cyclists. There was verbal discussion of the Planning Department reaching out to the interested parties, potentially through the MCC, to incorporate their knowledge, concerns and ideas in the process before a new permit is requested for road grading. Please add these to the meeting minutes so there is a proper record of the discussion and requests that the planning commission members made at the previous meeting.

Thank you.  
Sean
